# **Special Edition**

This **SPECIAL EDITION** of the "Alcohol & Tobacco Newsletter" is dedicated exclusively to the publication of a **DRAFT** of the third section of "The Beverage Alcohol Manual (BAM), A Practical Guide." This section covers basic mandatory labeling requirements for malt beverages. The BAM is intended as a multivolume practical guide to the laws, regulations, rulings and policies governing production, bottling, labeling, etc., of alcohol beverages. It is also intended to be a "living" document that will be updated periodically to reflect regulatory and other changes.

In creating and developing the BAM, ATF's underlying concept is that awareness and understanding of labeling and associated requirements simplify all processes related to beverage alcohol for both the submitter and ATF. While the BAM will be a guide to a variety of topics concerning alcohol beverages, it is not meant to replace ATF regulations, ATF rulings, the ATF Bulletin, industry circulars or rulemaking documents published in the Federal Register. These sources should also be consulted to assure compliance with the most current requirements.

Your feedback on this **DRAFT** is important to us and we want and are soliciting your comments on the content, the format, etc., and suggestions for improvements.

Send your comments or suggestions to the attention of the BAM staff
